INTRODUCTION

I consider myself a self-taught person, a curious and creative developer. I have professional experience working in the CRM domain as a low-code javascript/C# developer, I also have experience working with ReactJs and I am always looking for new knowledge horizons to build my dreams.

EXPERIENCE

Sep 2019
- Present

.NET/Javascript Developer

_ Captain Consulting, Djerba

Integrating business processes and web APIs in a low code platform (creatio) .

working with Talend software to prepare data integration tasks

working with Fast Report software to generate reports using .NET technologies

Jan 2017 -
Feb 2017

Initiation internship

_ Galactech studio, Tunis

My first opportunity to experience working in a group and exploring new technologies like Angular.js framework and firebase

EDUCATION

- ISET Charguia
— (2 years)
2016- 2018
- Lycée Houmt Souk Djerba
— Bachelor degree
2015 - 2016
- Lycée Ajim Djerba
2011 - 2015

PROJECTS

- **Data Migration** — A C#/WPF desktop application developed for our company for the purpose of speeding up the process of migrating data from a database to another with different structure. working on this application helped me learn different Technologies like MVVM Light and was an opportunity to work with different design patterns like MVVM, singleton and dependency injection .
- **Expensify** — An expense manager web application that I build using ReactJs during an online course where I learned setting up authentication, routing and testing and I exploring Redux, Webpack, Babel, Jest, Firebase, and many other tools
